Tap to cycle preset background images for the **Picture-Select Below** option.

Example background change

Example overlay change

Example showing over shoulder diplay

Step 1

Choose a **Background** source for your video.

- **Picture-Select Below** - applys a preset background image. To cycle images, tap the bottom left and right arrows.

- **Studio PC** - shows dedicated PC in the studio.

- **Laptop** - from your provided laptop plugged into the HDMI cable on the side of the table.

- **None** - shows green screen only, seen by the camera and nothing more.

- **Camera Off** - this allows for screen-only type videos, audio still captured.

Step 2

Choose an **Overlay Option,** the overlay will determine your size and position on the screen.

- **Full Camera** - presenter is full sized

- **Picture in Picture (PiP) Options** - presenter is a reduced size in the lower right. upper right, lower left, or upper left

Step 3

If applicable, choose an **Over-Shoulder Share** option. This allows you to maintain your chosen background, and have an additional window showing content from one of the sources below.

- **PC Display** - provides view of studio PC screen behind presenter

- **Laptop Display** - provides view of user laptop screen behind presenter

- **None** - turned off
